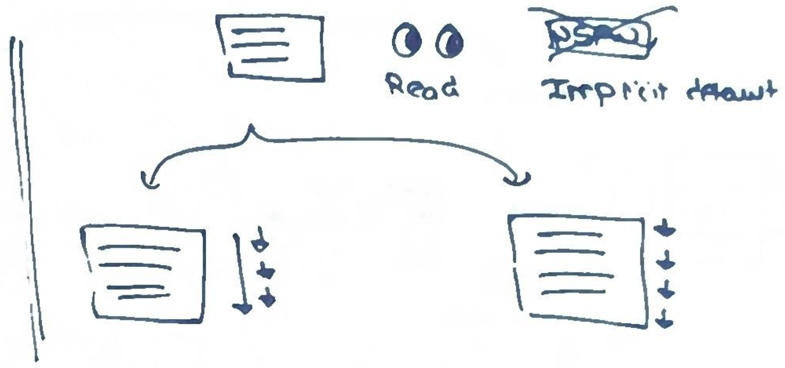
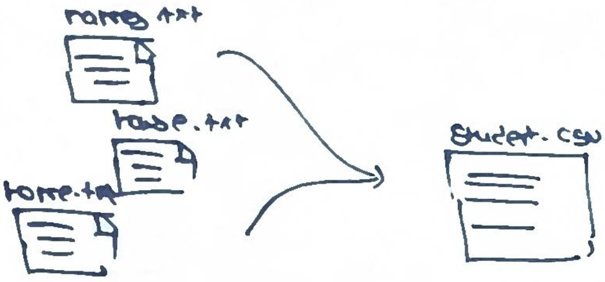
Blank document

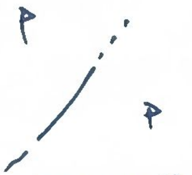
continue where you left



Read

Implicit default

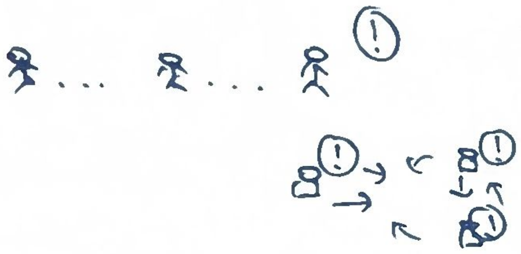




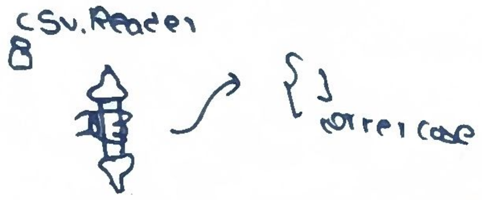
Delineate

Sort based on keys

lambda (no-name warrior)

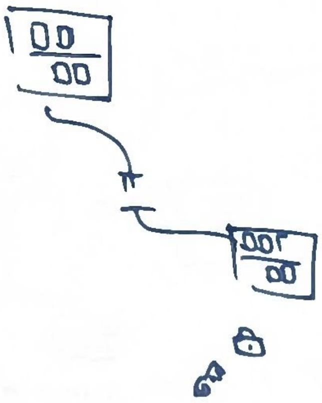


csv.Reader



corner case

I'll handle it for u



-- DictReader [{ }, { } ..]

9 November...

Explicitly
take ideas in the csv file

took time to update the correct name

→ 8 = [{ } { } ...]
8 8

9

name , home

harry , NQPD ↓

ron , burrow ↓

[{'name': harry, }
'name' : NQPD ,
{'name': ron
'name': burro}]
