

If you want answer to something try it out

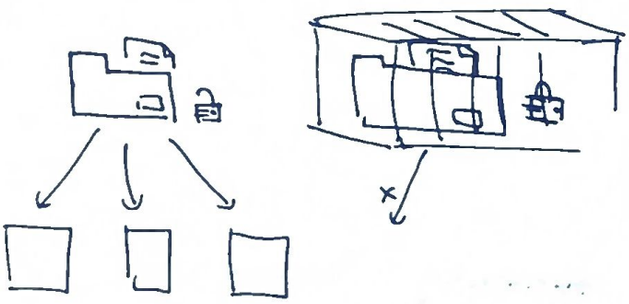

pole around to see what's going on.

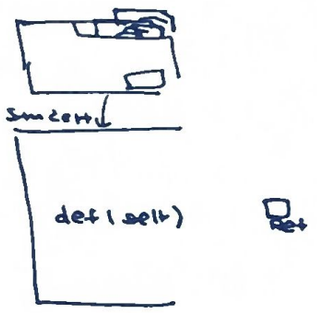

It is possible to limited some terminology to object but rather class

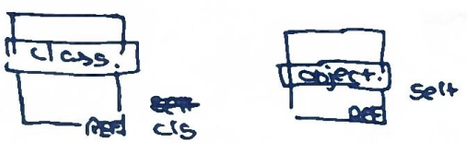

1:54:

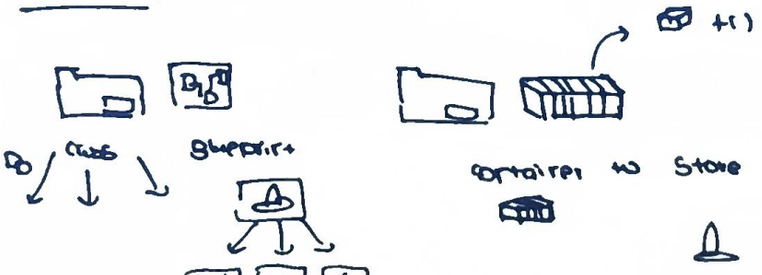

Class has container

writing definition inside class, we automatically pass self has a reference to current object

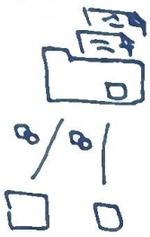

Revision-1

2:03

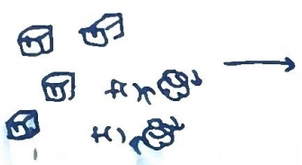

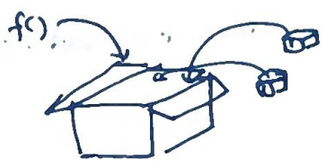

class offer better solution of having organizing related data & function together

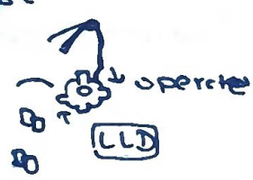

class is way of bundling related data & functionality together

Smells

design principle

instance variable

instance method

class Data & method

Herd

** Revision_3

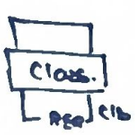

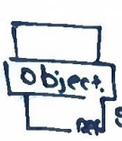

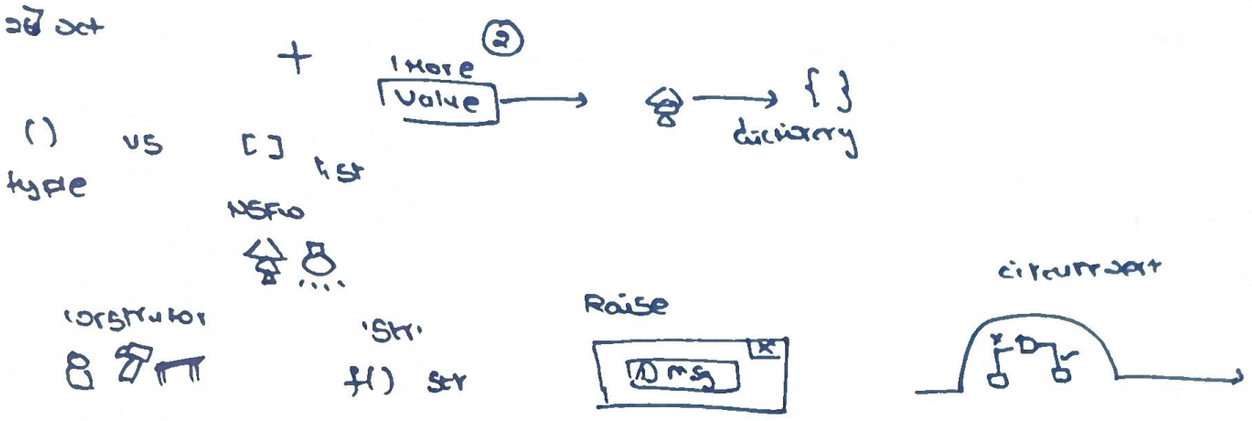

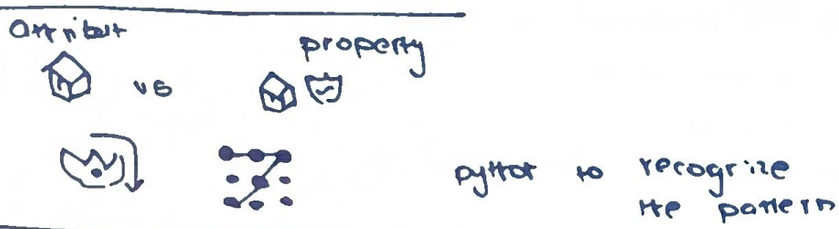

container to Bundle up

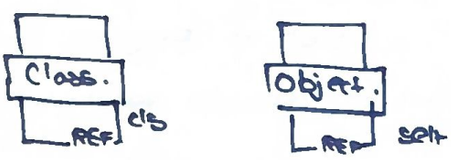

python to recognize the pattern

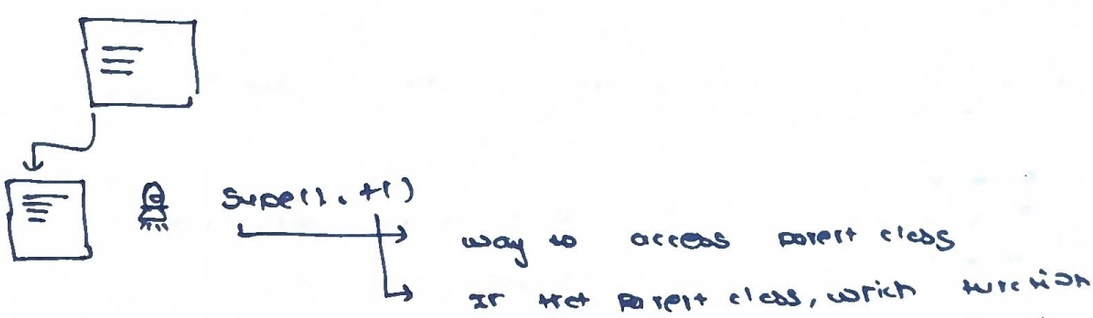

(way to organize related data & functionality)
