Revision - II - unit testing

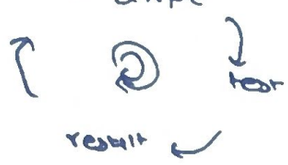

good practice

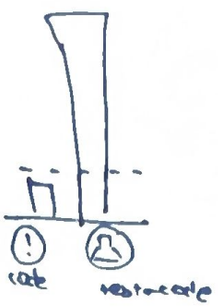

write a code to test your code

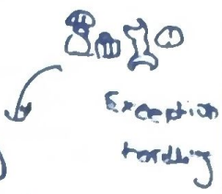

take a simple

test

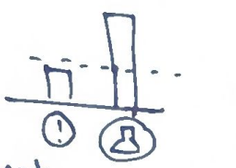

result

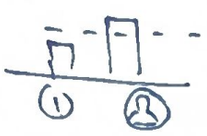

AssertionError

Exception handling

code test code

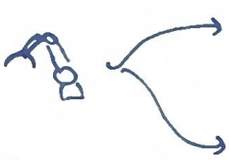

code test code

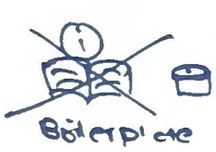

assert

boldly proclaim something to be true

pytest (Ruka robot) == tool that handles ① & SFx

exception handling

Boilerplate

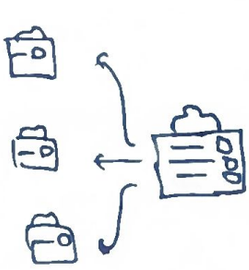

SFx

passing into

try

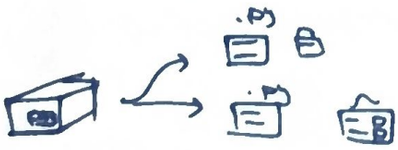

category of test

testing for Exceptions with pytest.raises(RuntimeError):

try()

packages contains multiple test module
